

Annual Report  
for the activities of the Bible Library (Bibliotheca Biblica)

June 2023 – June 2024

The library items now available to the visitors of Bibliotheca Biblica amount to 12464, including 54 items on electronic media, 9234 books and 3230 periodicals. A total of 130 library items were inventoried during the period: 92 books and 38 volumes of periodicals. The newly available items are in German, English, French, Modern Greek, Modern Hebrew and Bulgarian languages. Thanks to donations from Bibelwerk Stuttgart, Tübingen and Prof. Dr. The Christoph Dohmen Biblica has gradually being supplied with missing volumes from otherwise only partially available Biblical commentary series.

Information about the new library items is available on the General Catalog (Gesamtkatalog), updated monthly.

At the beginning of every academic year the above-mentioned library resources are presented with due diligence to newly admitted students. A practice has been established that some of the classes attended by students of the Faculty of Theology and of the department of "Hebraistics" are held in our reading room. As a result, the visits for the period were 612.

The "Virtual Library", created in 2020, is gradually being enriched with digitized books on Biblical Studies and enjoys heightened interest from students.

The main donors are Prof. Dr. Karl–Wilhelm Niebuhr, Prof. Dr. Konrad Huber, Bibelwerk Stuttgart, Verlag Mohr Siebeck Tübingen, Prof. Dr. Ivaylo Naydenov, Prof. Dr. Konstantin Nikolakopoulos, Rumen Stefanov, Prof. Dr. Christoph Dohmen.
